

DM867R

Protection Cover For Push Button Activated Manual Call Points (Red)

General

The DM867B is a RED protection cover for push-button-activated manual call points. This cover increases the IP rating of the manual call point enclosure from IP44 to IP54 and thereby makes its deployment possible in more challenging environments.

Details

- Increases the IP rating of push-button-actuated manual call points to IP54
- Suitable for all red manual call points in the 860, 950 and 2080 series
