

LC3-UM06E Ceiling loudspeaker 6W metal

The LC3-UM06E is a general purpose, cost effective 6 W dual cone ceiling loudspeaker for speech and background music reproduction.

Suitable for 100 V connection with power tapping for adjusting the sound level to meet the needs of the respective area.

A circular metal grille is an integrated part of the front. The appearance and neutral white color have been selected to be unobtrusive in virtually all interiors.

To inhibit fire from entering the cavity through the ceiling loudspeaker, the LC3-UM06E it is foreseen with a metal fire dome.

Functions

Voice Alarm applications

Voice alarm loudspeakers are specifically designed for use in buildings where system performance for verbal evacuation announcements is governed by regulations. The LC3-UM06E Loudspeaker is designed for use in voice alarm systems and is EN 54-24 certified and compliant with British standard BS 5839-8.

Protection

The loudspeakers have built-in protection to ensure that fire damage to the loudspeakers does not cause failure of the connected circuit. In this way system integrity is maintained, ensuring loudspeakers in other areas can still be used to inform people of the situation.

Connections

The loudspeakers have a ceramic screw-terminal connection block, thermal fuse and heat-resistant, high-temperature wiring.

- ▶ Suitable for speech and music reproduction
- ▶ Flush-mounting in ceiling cavity
- ▶ Metal fire dome
- ▶ EN 54-24 certified
- ▶ BS 5839-8 compliant

Regulatory information

All Bosch loudspeakers are designed to withstand operating at their rated power for 100 continuous hours in accordance with IEC 268-5 Power Handling Capacity (PHC) standards. Bosch has also developed the Simulated Acoustical Feedback Exposure (SAFE) test to demonstrate that they can withstand two times their rated power for short durations. This ensures improved reliability under extreme conditions, leading to higher customer satisfaction, longer operating life, and lessens the chance of failure or performance deterioration.

Safety	According to IEC/EN 62368-1
Emergency	According to EN 54-24 According to BS 5839-8
Water and dust protection	According to IEC/EN 60529, IP21C

Installation/configuration notes

Fig. 1: Dimensions in mm (in)

Mounting

Installation is easy with integral spring arms that securely hold the ceiling loudspeaker in its cut-out. A template is also provided for accurately marking the cut-out in ceiling panels.

Knockout holes

The loudspeaker has two knockout holes either for cable grommets, that are supplied and pre-mounted, or for optional cable glands like PG-13.5.

Terminal block

The loudspeaker has a two-way ceramic terminal block with screw connection and thermal fuse suitable for loop-through wiring. Three primary taps are provided on the matching transformer to allow selection of nominal full-power, half-power or quarter-power radiation (in 3 dB steps).
